Automated Tasks Delegation & Central Tasks Management in SPARK Workflow

This video will show you how you can create an automated delegation instances for your workflow tasks using SPARK Workflow "My Tasks Delegation" feature. this feature is very important for users and employees when they have to be absent from work because of a vacation or travel, once the user creates a

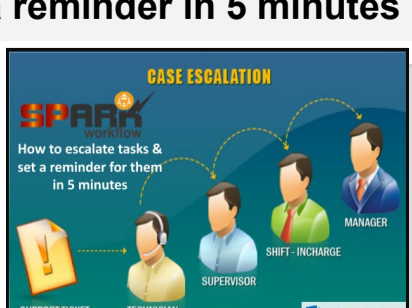

Watch the video Now!

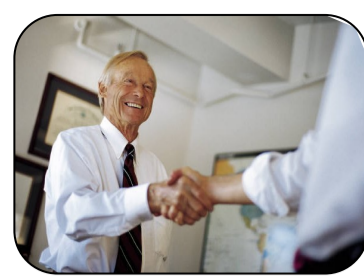

delegation instance, all tasks which will be assigned to him in the future will be automatically delegated to another user within the absent period specified in the instance, the user can specify if this delegation will be applied "Globally" on the entire farm or on a site level for tasks been assigned from within this site, or even on a list level, the user will be able to create multiple instances to delegate tasks to different users. The Site Administrator can create a delegation instance from any user to any user in case the user is unable to do it by himself. The Video will also show you a new great feature "Central Tasks Management" which allows Site's administrators to delegate or complete tasks on behalf of users in case they have many workflows stuck on a certain user account and that user is unable to access his account for any reason, administrators will be able to do a bulk delegations or complete an entire group of tasks with a click.

Escalate tasks & set a reminder in 5 minutes

In this video you will see how to configure your activity to escalate a pending task automatically to his manager if the "assigned to" user didn't respond to this task in a timely fashion. Also you will see how you can remind users about their pending tasks after a specific time in order to assure that all users will respond to their tasks within a reasonable time frame.
